Who We Are

A DGCA Authorized Remote Pilot Training Organization

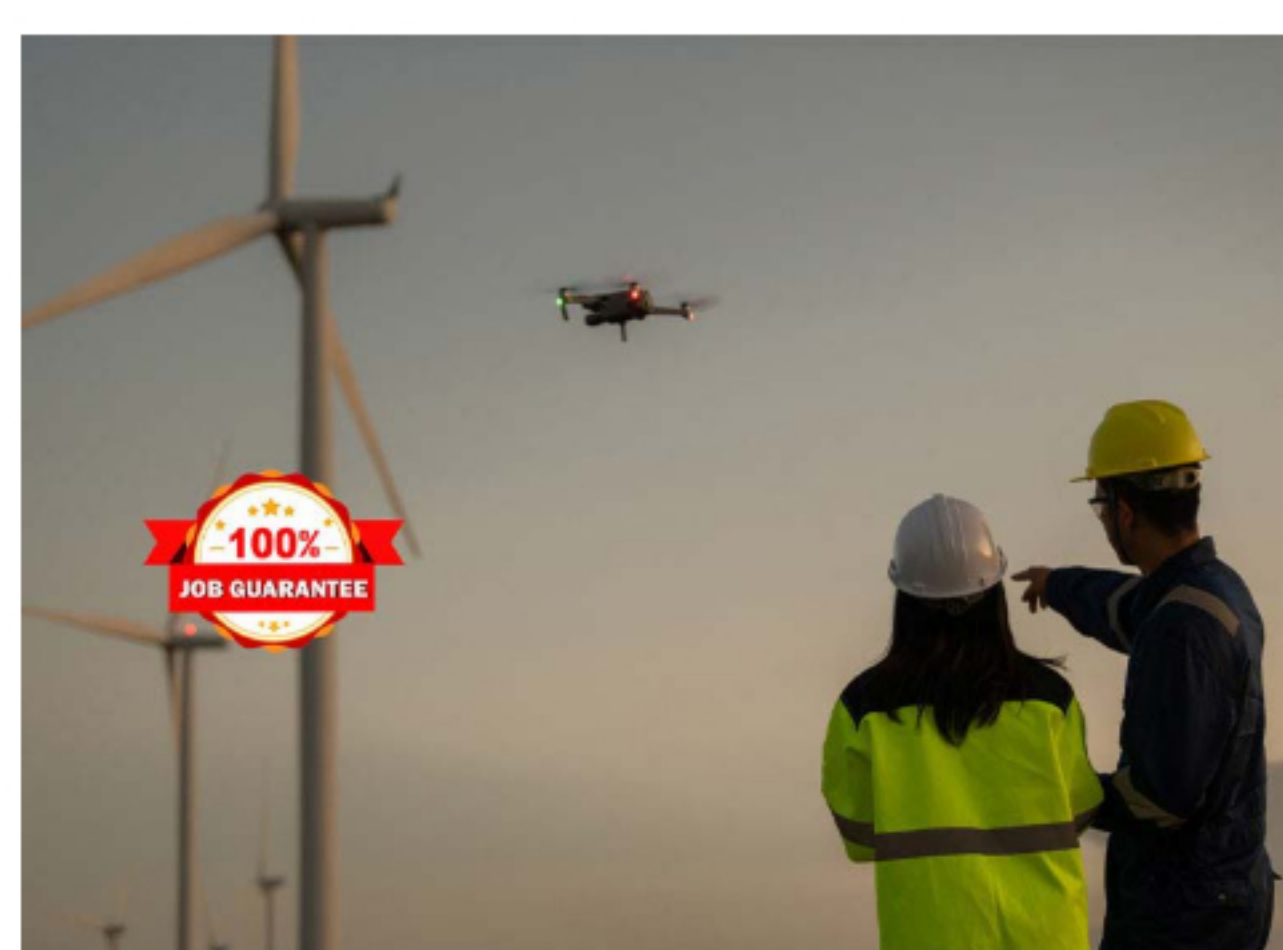

Welcome to DroneWorld is dedicated to being a drone firm that is at the forefront of futuristic technology for the people of India. We bring you Drone Training courses to help you gain that competitive edge and widen your professional horizons in industries such as Agriculture, Mapping, Security trainings and more. DroneWorld also extends its expertise in Drone Manufacturing and Services to private and government firms in domains such as Agriculture, Defence, Mapping, Surveillance, Photography, Delivery, Entertainment and Maintenance.

Drone World Training Programs

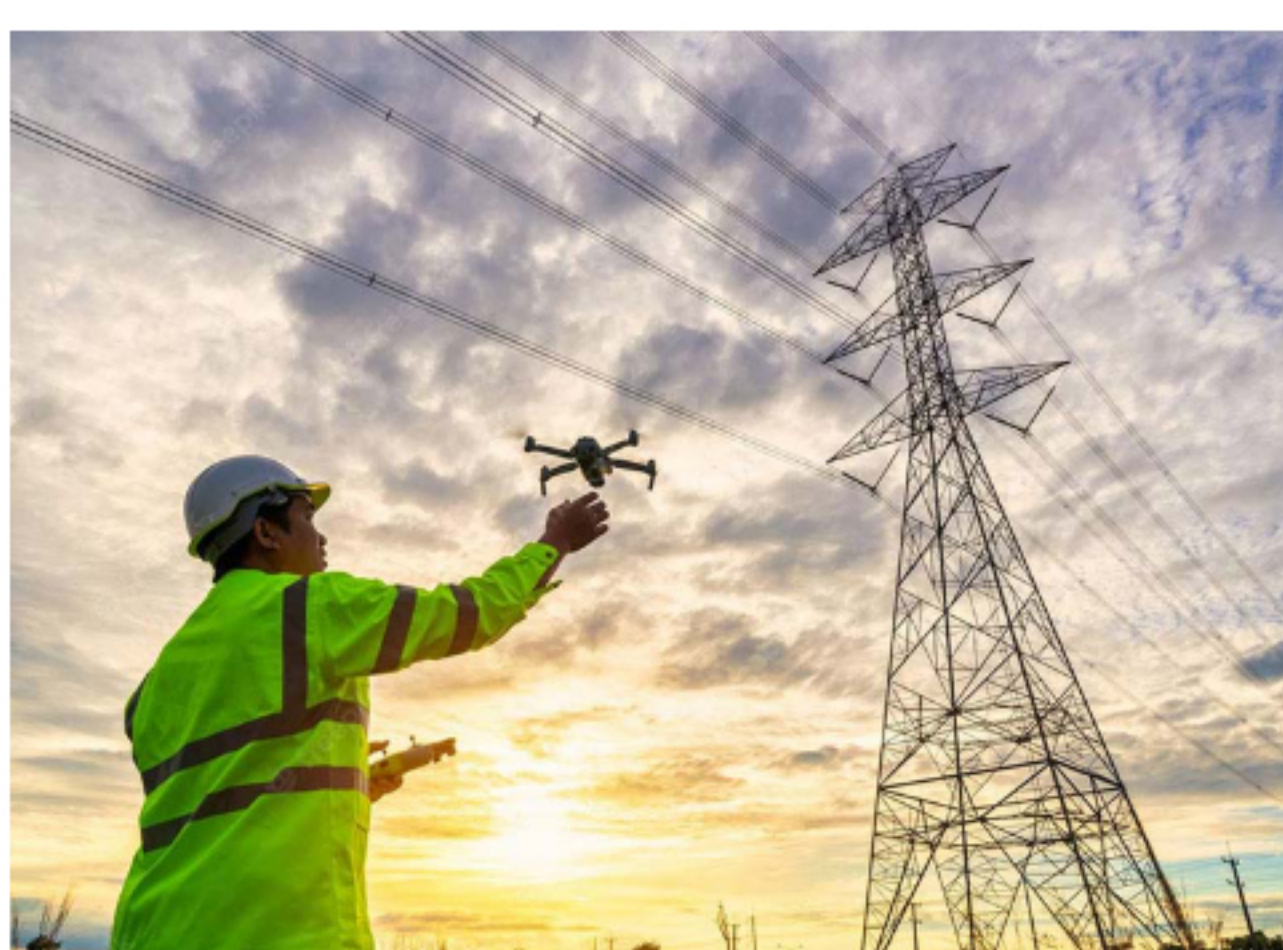

For Individuals, Schools & Corporates

**DGCA (Govt.) Authorized Remote Drone Pilot Training**

Drone laws, basic principles of flying, aerodynamics, weather and meteorology, risk assessment and analysis, drone data and analysis, and on-field 20+ hours of drone flying are all covered in this DGCA-approved certified drone pilot training, eligible for 18+ year old individuals.

**Advance Drone Technology and Applications**

A comprehensive drone pilot training program for in-depth understanding of drone technology and its applications with Job guarantee. With 300+ hours of training offline spanning across 3 months, the candidates are trained on professional skills and knowledge related to job roles.

**Corporate Training Program**

For specialized requirements pertaining to various industry domains, this tailored approach with customized training allows corporates to train their professionals with specific mapping skills. A special course is crafted to enable a corporate to develop to a technologically enhanced environment.

**Training for Schools (K-12)**

An introduction to drones, aeromodeling concepts, understanding drones, building drones, sensors in drones, flying drones, understanding motors and batteries, and programming a drone for various applications are covered in this drone course for high school students eligible from 8+ years.

Testimonials

What Our Students Say

The training course has good theoretical component. The basic practical training has been great although had some limiting factors based on theory. Our practical training guide Akshay Kumar gave us excellent training and guidance. His ability to communicate in different languages fluently came helpful for a batch with individuals speaking English or Marathi or Hindi. The accommodation for the 3 days was great. The only limiting factor which would need improvement is the food. Having food that's neutral to all Indians would be basic, and sourcing hygienic and healthy food should be a important part of the accommodation. Overall great experience, thank you DroneWorld!

Brynn Vaz

Opportunities Following Drone Certification

Autonomous transportation is the technology of the future. Drone training entails applying skills in a practical environment and sets you up for a role in various industries.
